

Solution Architect

Exceptionally talented IT professional with hands-on experience in developing and supporting high-tech business/software/RPA solutions leveraging robust technologies, tools, and best practices. Passionate to become full-stack software engineer specialising in C#, Python, and/or Java.

Track record of success managing teams, engineering projects, and deadlines, and spearheading object-oriented software development lifecycle, maintenance, testing, and troubleshooting using advanced software delivery approaches, Waterfall, and Agile methodology. Experience in creating scalable applications for data collection and visualisation using the Microsoft Power Platform (Power Apps, Power BI, and Power Automate). Specialised in evolving, advancing, and revamping new user-facing features, troubleshooting diverse technical issues, building code in Python, and C#, and integrating into RPA solutions.

Key Career Highlights/Core Competencies

- Exceptionally skilled at designing, creating, maintaining, and querying SQL server databases.
- Success in designing and delivering multiple RPA projects using Intelligent Document Processing Technologies.
- Proficient in using APIs and integrating them into Software/RPA solutions.
- Knowledgeable in Artificial Intelligence, Machine Learning, and Neural Networks.
- Possess solid understanding of object-oriented principles and design patterns.
- Capable of understanding user and business system needs, resolving outages, and modelling application systems.
- Excels at writing clean, efficient, and highly maintainable code.

Education & Credentials

MSc Advanced Computer Science, Distinction

University of Strathclyde, Glasgow, UK (Sep 2018 – Sep 2019)

Master's Dissertation: Predicting the Resolution Time and Priority of Bug Reports: A Deep Learning Approach

BEng (Hons) Computer and Electronic Systems, 2:2

University of Strathclyde, Glasgow, UK (Sep 2013 – Jun 2017)

4th Year Project: Developing a Computer-Based Version of the Board Game Vector Racer using Java (Merit)

Professional Experience

Technical Solution Architect | Deloitte LLP UK

Mar 2022 – Current

Supervise and guide developers through building and testing phases of development lifecycle. Contribute to full development lifecycle of RPA project, initiating from proposal and requirements gathering, whilst collaborating with client to ensure smooth deployment of RPA solution to production environment and Hypercare.

- Won four new projects by introducing new technology; Microsoft Power Stack within technical stack of team.
- Saved client 10,000+ hours and £250,000 in revenue annually by developing and implementing effective document processing automation.
- Optimised governance of timesheet and forecasting tools through development of two innovative solutions for client, resulting in saving 5000+ hours per year and improving governance by 30%.
- Concepted, developed, and concluded multiple projects in alignment with client requirements by leveraging advanced functional expertise in UiPath, Automation Anywhere, Python, SQL Server, C#, Microsoft Power Platform, and Azure Forms Recogniser.

- Owned and controlled RPA infrastructure, including servers, VDIs, and control rooms.

Operational Solution Architect | Momenta People Limited – Contractor for Deloitte LLP UK Nov 2021 – Mar 2022

Owner of concepting and designing low, medium, and high complexity changes to RPA automations. Led and completed project for internal RPA optimisations within deadlines. Adopted attention to detail in coding and documentation for reviews to ensure seamless onboarding of new RPA solutions to support team.

- Minimised overall error rates by 25% and support time by 15% through effective management of migration project that optimised all internal automations into new platform.
- Enhanced effectiveness of internal operating procedures and governance to support technical standards, training, testing, deployment, infrastructure management, and password administration.
- Reduced new graduate engineers training time from 6 to 4 weeks through efficient development of low budget training programme with its own platform identical to production platform.
- Brought more than £80,000 in additional revenue by designing over 40 changes consistent with client requirements.

Principal Automation Engineer | Momenta People Limited – Contractor for Deloitte LLP UK Apr 2021 – Nov 2021

Functioned as direct line manager for team of nine engineers to navigate support and build activities. Engaged in recruiting and training new automation engineers. Improved client communications and reporting by liaising with service desk team.

- Headed and coached team of nine support engineers, resulting in advancing two support engineers to senior engineers' role within six months.
- Provided exceptional leadership support, guidance, and coaching that enhanced engineers' retention rates as high as 90%.
- Took full ownership of monitoring process and team performance, evaluation of knowledge gaps, and enhancement of technical team understanding/knowledge about processes and technical automation.
- Increased effectiveness of internal operating processes and governance for onboarding and decommissioning.

Senior Automation Engineer | Momenta People Limited – Contractor for Deloitte LLP UK Sep 2020 – Apr 2021

Engaged in improvement of team' documentation and coding standards. Documented, filtered, and escalated issues requiring attention of technical lead or principal engineer. Improved logging and supported capabilities of RPA solutions by performing internal functionality changes.

- Delivered technical expertise, guidance, and acted as escalation point for team of engineers to support 30+ RPA solutions.
- Saved support team 50 hours in manually generating reports monthly by designing internal custom reporting tool allowing service desk to provide updates to clients.
- Increased 20% principal engineer's capacity through becoming SME of all solutions supported by team with aim to train rest of engineers and reduce incidents escalations to principal engineer.

Graduate Automation Engineer | Momenta People Limited – Contractor for Deloitte LLP UK May 2020 – Sep 2020

Conducted complex investigations and root cause analysis to determine and resolve incidents as well as propose performance optimisation initiatives. Consulted and co-ordinated with clients to better comprehend their needs and expectations for their RPA solutions.

- Served as integral part of automation engineering team to deliver support for 30+ RPA solutions across multiple clients.
- Credited with identifying and resolving 350+ incidents with 95% within SLA periods
- Optimised straight-through processing rate through development of 18 small changes and 11 standard changes to 15 existing solutions.
- Incorporated new capabilities and number of complexity bug fixes in Automation Anywhere and UiPath.

Additional Experience: *Restaurant Assistant Manager, Lynnet Leisure, Glasgow, UK (Jul 2019 – May 2020)*

Professional Training & Certifications

Certified Advanced RPA Developer v1.0 (UiARD) | UiPath

Certified Advanced RPA Professional (A360) | Automation Anywhere

Technical Proficiencies

Python, SQL Server, C#, Azure Forms Recogniser, Microsoft Power Platform, HTML, CSS, Java, and R

Languages

Bilingual: Bulgarian (Native) | English (Fluent)
